Self-Paced Exam

COCKERELL
DERMATOPATHOLOGY™

Diagnostic Excellence. Unparalleled Service.™

Clay J. Cockerell, MD
Founder & Medical Director

Self-Paced Exam

1. The best diagnosis is:
 - a) Discoid lupus erythematosus
 - b) Chronic graft vs host disease
 - c) Viral exanthem
 - d) Spongiotic drug eruption
 - e) Erythema multiforme

2. The best diagnosis is:
 - a) Drug hypersensitivity reaction
 - b) Leukocytoclastic vasculitis
 - c) Sweet's syndrome
 - d) Granuloma faciale
 - e) Persistent insect bite reaction

3. The best diagnosis is:
 - a) Lupus erythematosus profundus
 - b) Scar
 - c) Morphea
 - d) Connective tissue nevus
 - e) Chronic radiodermatitis

4. The best diagnosis is:
 - a) Erythema nodosum
 - b) Lupus erythematosus profundus
 - c) Erythema induratum
 - d) Lipomembranous panniculitis
 - e) Inflammatory morphea

5. The best diagnosis is:
 - a) Basal cell carcinoma
 - b) T-cell lymphoma
 - c) Pseudolymphoma
 - d) Merkel cell carcinoma
 - e) Malignant peripheral nerve sheath tumor

6. The best diagnosis is:
 - a) Metastatic breast cancer
 - b) Microcystic adnexal carcinoma
 - c) Desmoplastic trichoepithelioma
 - d) Trichoadenoma
 - e) Mixed tumor of the skin

7. The best diagnosis is:
- a) Malignant melanoma
 - b) Reticulohistiocytic granuloma
 - c) Juvenile xanthogranuloma
 - d) Compound "dysplastic" nevus
 - e) Compound Spitz nevus
8. The best diagnosis is:
- a) Spindle cell hemangioma
 - b) Acroangiodermatitis
 - c) Kaposi's sarcoma
 - d) Angiosarcoma
 - e) Aneurysmal benign fibrous histiocytoma
9. The best diagnosis is:
- a) Eccrine acrospiroma
 - b) Xanthogranuloma
 - c) Atypical fibrohistiocytic xanthoma
 - d) Merkel cell carcinoma
 - e) Metastatic melanoma
10. The best diagnosis is:
- a) Desmoplastic trichoepithelioma
 - b) Basal cell carcinoma
 - c) Trichofolliculoma
 - d) Basaloid follicular hamartoma
 - e) Trichoblastoma
11. The best diagnosis is:
- a) Contact dermatitis
 - b) Pityriasis rosea
 - c) PLEVA
 - d) Lichen striatus
 - e) Psoriasis
12. The best diagnosis is:
- a) Hand, foot and mouth disease
 - b) Incontinentia pigmenti
 - c) Pemphigus vulgaris
 - d) Linear IgA disease
 - e) Herpes simplex virus infection

13. The best diagnosis is:
a) Grover's disease
b) Hailey Hailey disease
c) Pemphigus vulgaris
d) Epidermolytic hyperkeratosis
e) Squamous cell carcinoma
14. The best diagnosis is:
a) Dermatomyositis
b) Lichen planus
c) Discoid lupus erythematosus
d) Morphea
e) Polymorphic light eruption
15. The best diagnosis is:
a) Pityriasis lichenoides
b) Sarcoid
c) Congenital melanocytic nevus
d) Lymphomatoid papulosis
e) Mastocytosis
16. The best diagnosis is:
a) Trichoepithelioma
b) Basal cell carcinoma
c) Merkel cell carcinoma
d) Sebaceous carcinoma
e) Trichoblastoma
17. The best diagnosis is:
a) Insect bite reaction
b) Tumid lupus erythematosus
c) Polymorphic light eruption
d) Inflammatory morphea
e) Lymphomatoid papulosis
18. The best diagnosis is:
a) Sebaceous carcinoma
b) Basal cell carcinoma
c) Sebaceoma
d) Trichilemmoma
e) Sebaceous adenoma
19. The best diagnosis is:
a) Necrobiosis lipoidica

- b) Rheumatoid nodule
 - c) Kaposi's sarcoma
 - d) Epithelioid sarcoma
 - e) Granuloma annulare
20. The best diagnosis is:
- a) Clear cell actinic keratosis
 - b) Verruca vulgaris
 - c) Condyloma
 - d) Irritated seborreic keratosis
 - e) Bowenoid papulosis
21. The best diagnosis is:
- a) Microcystic adnexal carcinoma, nodular type
 - b) Syringoma
 - c) Desmoplastic trichoepithelioma
 - d) Aggressive digital papillary adenoma
 - e) Dermal duct tumor
22. The best diagnosis is:
- a) Nodular scabies
 - b) Pagetoid reticulosis
 - c) Syphilis
 - d) Pseudolymphoma
 - e) Mycosis fungoides, tumor stage
23. The best diagnosis is:
- a) Clear cell hidradenoma
 - b) Chondroid syringoma
 - c) Eccrine spiradenoma
 - d) Hidradenoma papilliferum
 - e) Metastatic renal cell carcinoma
24. The best diagnosis is:
- a) Halo nevus
 - b) Malignant melanoma
 - c) Benign lichenoid keratosis
 - d) Spitz nevus
 - e) Lichen planus
25. The best diagnosis is:
- a) Psoriasis

- b) Epidermal nevus
 - c) Axillary granular parakeratosis
 - d) Seborrheic keratosis
 - e) Porokeratosis
26. The best diagnosis is:
- a) Squamous cell carcinoma
 - b) Proliferating tricholemmal cyst
 - c) Pseudoepitheliomatous hyperplasia
 - d) Bowen's disease
 - e) Trichilemmoma
27. The best diagnosis is:
- a) Epidermolytic Hyperkeratosis
 - b) Epidermodysplasia Verruciformis
 - c) Hailey-Hailey Disease
 - d) Freeze artifact
 - e) Verruca Vulgaris
28. The best diagnosis is:
- a) Normal skin
 - b) Ichthyosis Vulgaris
 - c) Seborrheic Keratosis
 - d) Tinea Versicolor
 - e) Urticaria
29. The best diagnosis is:
- a) Dermatofibrosarcoma protuberans
 - b) Kaposi's sarcoma
 - c) Sclerosing hemangioma
 - d) Metastatic melanoma
 - e) Merkel cell carcinoma
30. The best diagnosis is:
- a) Cinnabar tattoo reaction
 - b) Hypertrophic scar
 - c) Carbon tattoo
 - d) Silicone implant reaction
 - e) Monsel's solution reaction
31. The best diagnosis is:
- a) Granuloma annulare
 - b) Lupus pernio
 - c) Lichen striatus

- d) Chilblains
 - e) Arthropod bite reaction
32. The best diagnosis is:
- a) Angiokeratoma
 - b) Hemangioma
 - c) Arteriovenous hemangioma
 - d) Lymphangioma circumscriptum
 - e) Targetoid hemosiderotic hemangioma
33. The best diagnosis is:
- a) Tumor of the follicular infundibulum
 - b) Basal cell carcinoma
 - c) Reticulate seborrheic keratosis
 - d) Fibroepithelioma of Pinkus
 - e) Basaloid follicular hamartoma
34. The best diagnosis is:
- a) Incontinentia pigmenti
 - b) Pemphigus foliaceus
 - c) Herpes virus infection
 - d) Phytophotodermatitis
 - e) Fixed drug eruption
35. The best diagnosis is:
- a) Pyogenic granuloma
 - b) Metastatic renal cell carcinoma
 - c) Clear cell sarcoma (melanoma of soft parts)
 - d) Nodular hidradenoma
 - e) Balloon cell melanoma
36. The best diagnosis is:
- a) Calcinosis cutis
 - b) Rheumatoid nodule
 - c) Lipoid proteinosis
 - d) Deep granuloma annulare
 - e) Gout
37. The best diagnosis is:
- a) Nevus of Ito
 - b) Metastatic melanoma
 - c) Cellular blue nevus

- d) Bednar tumor
 - e) Neurothekeoma
38. The best diagnosis is:
- a) Neurothekeoma
 - b) Xanthoma
 - c) Sarcoid
 - d) Granular cell tumor
 - e) Leiomyoma
39. The best diagnosis is:
- a) Eccrine spiradenoma
 - b) Mixed tumor of skin
 - c) Solid-cystic hidradenoma
 - d) Metastatic gastric adenocarcinoma
 - e) Merkel cell carcinoma
40. The best diagnosis is:
- a) Hibernoma
 - b) Granular cell tumor
 - c) PEComa
 - d) Lipoblastic liposarcoma
 - e) Clear cell sarcoma
